- Wireframing
- Database Management
- Task Management
- Project Planning
- Time Management
- Administration
- Insurance Administration

I'm a caring guy who, once I've found something I'm passionate about, pursues it and my latest passion, coding. I've always enjoyed working with computers, and after a long journey of discovering myself, I realised that I'd enjoy a life of programming and development.

### WORK EXPERIENCE

2021 (6 Months)

#### **Stream manager for TeamCRAMP**

I made sure that everything ran smoothly while they streamed and acted as an advisor when big changes were made in the background of their channel.

2020 (1 Month)

#### **Garden work for Matthew Petters**

He asked me to help him take out the old lawn and of the previous owners and of course I stepped up and dug up the old grass.
